OrjaBox is pleased to share information about educational services. Our aim is to educate students about renewable energy applications through on field demonstrations and online courses.

Demonstrations:

- ❖ Live demonstration with real devices
- ❖ Students get to handle devices
- ❖ Practical applications of science principles like reflection, absorption, etc.
- ❖ Renewable energy project guidance for group activities.

Renewable Energy Online Sessions:

- ❖ Designed for student's 8th to 10th grade
- ❖ Information about technology applications and development aspects
- ❖ Ideas about RE projects for students
- ❖ Quiz and innovative assignments

Sustainable Cooking:

- ❖ Introduction to sustainability and food security
- ❖ Sustainable cooking concepts
- ❖ Introduction to cooking fuels, stoves, raw material information
- ❖ Innovative activities and assignments
